WATER FILTER

For over 150 years, Doulton Water Filters have delivered clean and healthy drinking water. Today Doulton Water Filters provide point of use purification for residential and commercial premises in 140 countries worldwide, serving the needs of millions of people every day.

Manufactured by Fairey Industrial Ceramics Limited, the acknowledged world leader in the development and manufacture of ceramic materials, the Doulton name has become synonymous with quality and water purity.

Ceramic Filtration-A proven system

Ceramic filtration systems are regarded as the most cost effective and proven methods of water filtration, effectively removing water borne contaminants and providing clean, healthy drinking water.

Fairey Industrial Ceramics' commitment to providing the very best in ceramic drinking water filtration systems has led to the development of the new ICP counter top product range. A product range that combines eye catching design with the latest advances in technology.

ICP-the new counter top model

State of the art design

Aesthetics have not been a high priority in water filter design. ICP changes this. State of the art design and modelling techniques have been used to ensure that this comprehensive range, is as eye catching as it is effective.

But, advances in design are not just confined to the filter housing. A new range of 2 3/4" Candles has been specially developed to improve capacity and maintain Doulton Water Filters exacting levels of filtration capability.

Unrivalled Performance -and that's a fact

ICP filters incorporate the very latest advances in filtration technology to deliver clean and healthy drinking water - delivering real improvements in performance including:

- Latest ergonomic designs
- New Candle size
- Increased flow rates
- Increased capacity
- LCD flowmeter (optional)
- LCD Candle capacity meter (optional)
- Proven removal levels of water borne contaminants
- Absolute filtration to 0.9 micron (>99.99% @ 0.9 micron).

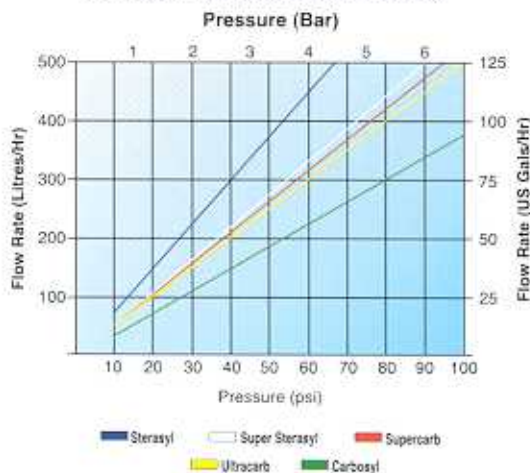

Contamination of drinking water takes many forms and it is vital that any claims made by manufacturers about their products are fully supported by independent test results.

Fairey Industrial Ceramics submit products to rigorous test procedures. On site tests measure long term product performance and some of the world's leading independent laboratories, including NSF in Michigan USA and Hyder and WRc in the UK, verify all performance claims.

All this means that, as with every Doulton water filter, the ICP range provides unrivalled performance backed by independent research.
