SYSTEMS®**

Simply Water

Simply Water... clear and refreshing, filtered from ordinary tap water. By utilizing a self-cleansing technology, Water Factory Systems' reverse osmosis drinking water systems ensure long lasting water quality. Public or private well supply, Water Factory Systems® technologies ensure only clear fresh water flows from your tap.

Features and Benefits:

- NSF certified and listed for contaminant reduction
- Sanitary Quick Change filter cartridges for easy installation and service — no spills, no mess
- Separate prefilters increase sediment holding capacity and increase membrane protection
 - 5 micron sediment filter
 - Granular Activated Carbon Filter
- High Flux TFC RO Membrane
- Radial flow block carbon polishing filter for highest faucet output
- Patented stealth flow control for long life of reverse osmosis membrane
- Slim profile, space saving design
- System designed for both chlorinated and non-chlorinated municipal or well systems
- Conserves water, shutting down when storage tank is full. Automatically turns on to refill tank.
- 1/4 turn sanitary quick-change filter designed for clean, easy cartridge changes. System design minimizes risk of injury and physical challenges associated with undersink appliance maintenance.

SQC™ RO Systems

High Quality Water

Advanced multi-stage reverse osmosis filtration system
Exclusive quick change filter design

Made from FDA* CFR-21
Compliant Materials
*Food and Drug Administration

Water at its Finest!™

Reverse Osmosis Water System (for use with included beverage faucet)

Advantages of the SQC™ RO System

- Easy installation beneath kitchen sink conveniently dispenses purified water for all healthy water-based cooking and consumption.
- Requires no electricity, powered by residential water line pressure.
- Adaptable for use with non air-gap decorative faucets to match any decorative style and function.
- Sanitary Quick Change System
 - safe, clean filter replacement eliminates handling filter media
 - pre and post filters as easy to change as a light bulb
 - RO module equipped with quick-connect fittings for tool-free replacement
- Capable of providing RO filtered water to multiple locations:
 - kitchen and bar sinks, lavatory, hot-water dispensers and refrigerator/icemakers.

System Model: SQC4 Drinking Water System

Replacement Cartridge Model:

47-55702G2, 47-55704G2, 66-4706G2, 47-55710G2

Price Per Gallon of Water

Water Cooler	Bottled Water	Pour Through Pitcher	Filter in Faucet	SQC4
\$1.25 per gallon plus monthly rental fees	\$0.79 to \$1.50 per gallon plus labor and handling	\$0.20 per gallon ¹ plus patience	\$0.18 to \$0.25 per gallon ¹ bulky and unsightly	\$0.17 per gallon¹ <i>Reverse Osmosis</i>
<ul style="list-style-type: none"> • Expensive • Heavy 5 gallon bottles weigh 40 lbs (18.1 kg). Risk of injury and spills. • Water delivery-By homeowner or more often by diesel engine (leaded fuel) trucks. • Storage required for both full and empty bottles. • Awkward placement. Clash with high-style decorative kitchen designs. • Often requires electricity. • Limited usage-not practical for food preparation. • Cannot supply other water using appliances. 	<ul style="list-style-type: none"> • Expensive • Heavy and cumbersome. • Difficult to transport. • Requires frequent trips to market. • Storage space required. • Limited usage-not practical for food preparation. • Cannot supply other water using appliances. • Bottled water not necessarily 'safer' than ordinary tap water¹. <p>¹ National Resources Defense Council (NRDC)</p>	<ul style="list-style-type: none"> • Frequent filter replacements with yearly costs above \$75². • Limited volume-complaints of constant filling which can take up to 20 minutes. • Pitcher requires continuous cleaning, takes up space on counter or inside refrigerator • Limited usage-not practical for food preparation/cooking due to limited capacity. • Clogs easily-even slower drip filtration plus shorter filter life. • Cannot supply other water using appliances. <p>¹ Cost per gallon based on replacement cartridge cost ² Consumer Reports, Aug 2000</p>	<ul style="list-style-type: none"> • Frequent filter replacements with yearly costs above \$90². • Short filter life: 200 gallons (757 liters). • Awkward styling: low decorative appeal. • Lower flow rates (0.5 gpm/1.89 lpm) than faucet mount styles. • Clogs easily-even slower flow rates with shorter filter life. • Cannot supply other water using appliances. <p>¹ Cost per gallon based on replacement cartridge cost ² Consumer Reports, Aug 2000</p>	<ul style="list-style-type: none"> • Average three year (self-flushing) membrane life. • One year pre/post filter life: low maintenance • Easy filter replacement: no tools required • Separate faucet dispenses filtered water on demand. • Can service other water using appliances: refrigerator water/ice, hot water tap, bar sink). • Reduces molecular sized Total Dissolved Solids (TDS). <p>¹ Cost per gallon based on annual pre and post filter replacement plus membrane replacement every three years.</p>

Do not use with water that is microbiologically unsafe or of unknown quality without disinfection before or after the system.
Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts.

Visit www.nsf.org for the claims associated with products that are NSF listed.
